PARENT CORRESPONDENCE

Dear Parents/Carers of students in Room 13.

After an extensive application process Kylie Ticehurst has been selected from a highly competitive field to complete a teacher-led research project. This opportunity comes with funding to support this research. Teacher-led research is an investment in teachers as agents of change. It provides time for high performing teachers to inquire deeply into an area of the school curriculum, by collecting and analysing evidence to identify student learning needs.

Kylie will complete her research in the area of reading with a focus on comprehension. This work will further strengthen what we are doing in our Strategic Plan around continual improvement in this important area of the curriculum.

Kylie will receive 40 days to assess her students, research best practice and trial new ideas. On these days Micky Smith will replace Kylie. Micky is well known to the students at Moonee Ponds West. The majority of these days fall on a Friday.

Thank-you

Randal Symons

Assistant Principal
