28th July 2016

Dear Parents/Carers,

It has come to my attention that a student in Room 6 has shown symptoms of Impetigo, more commonly known as ‘school sores’.

Impetigo is an infection of the skin and is very easily spread, but with care the spread of infection can be reduced.

Please see the attached fact sheet Impetigo-school sores, from the Department of Health for further information.

If your child is unwell please keep them at home and advise the school of their absence.

Kind regards,

Patrick O’Connor
Class teacher – Room 6
